

JetGuard Safety Air Gun

Air cone shield protects against
 chip fly-back

OSHA Safety Air Guns

All Guardair Safety Air Guns are designed with nozzles that meet or exceed OSHA STANDARD 1910.242(b) 30 psi requirement.

JetGuard

Designed for close-in benchtop applications where flying chips and debris are a concern. JetGuard's proprietary air cone helps shield the operator from dangerous chip fly-back, while the ergonomic pistol-grip handle and wide trigger provide comfortable control throughout the day.

- **Protection by Design** – Engineered to provide a protective air cone to shield debris from the user.
- **Comfort** – Handle and trigger designed to reduce hand fatigue with repeated use.
- **Durable Construction** – Built for harsh industrial environments and daily use.
- **Flexible Options** – Choose from the standard 74S or 74SK with volume control dial
